EDUCATION

Bachelor of Engineering (Computer Science Engineering)
Pandit Deendayal Energy University

2022 - 2025
CGPA 8.9/10

Diploma of Engineering (Computer Science Engineering)
Gujarat Technological University

2019 - 2022
CGPA 9.7/10

EXPERIENCE

Software Development Engineer, Renil

May 2024 – Oct 2024

- Developed robust software solutions using Java, Spring Boot, and RESTful APIs, delivering 3+ capstone projects.
- Applied Postman extensively for API testing and documentation, ensuring 100% API endpoint coverage.
- Built and maintained microservices architecture, reducing inter-service latency by 65%.
- Enhancing system uptime by 35% with Prometheus and Grafana monitoring.
- Developed full-stack expertise, integrating 10+ industry-standard tools.
- Led 17+ code reviews and collaborated with cross-functional teams to deploy applications on AWS and Docker

SKILLS

Languages: Java, JavaScript, Python, C++, HTML, CSS

Databases: H2, MySQL, MongoDB, PostgreSQL, Oracle, SQL server

Machine Learning: TensorFlow, Keras, Scikit-Learn

Frameworks & Libraries: Spring Boot, Flask, Express, Node, React.js

DevTools: AWS, Docker, Kubernetes, Jenkins, Postman, Jira, Git, GitHub, Prometheus, Grafana

Adv. Java: Core Java, OOPs, Collections, Design Pattern, Spring DTO, Spring Data JPA, Spring Security

Soft-Skills: Leadership, Problem Solving, Collaboration, Effective Communication, Adaptability, Attention to Detail, Teamwork

PROJECTS

EngageHub – CRM

July 2024 – Present

- Architected and deployed 4 high-performance microservices (Appointment, Business, Review, Customer).
- Integrated GraphQL for efficient data fetching, reducing over-fetching by 70% and improving performance by 45%.
- Adopted Netflix DGS framework, accelerating GraphQL development by 50% and streamlining integration of 5+ microservices.
- Processing 200 + daily transactions with 99.99% uptime, reducing inter-service latency by 65%.
- Tech stack: Spring Boot, Netflix DGS, PostgreSQL, Docker, Kubernetes, Jenkins/GitHub Actions, AWS.

Smart Citizen Wastebin

June 2024 - July 2024

- Engineered a real-time waste bin monitoring system using object-oriented principles.
- Established a notification system alerting authorities, decreasing overflow incidents by 60% city-wide.
- Leveraged Prometheus and Grafana to monitor 20+ critical metrics, improving system reliability by 30%.
- Tech stack: Spring Boot, Security, PostgreSQL, Docker, Prometheus, Grafana.

MovieVerse

May 2024 - June 2024

- Guided in developing RESTful APIs, improving project delivery time by 20% and handling 1,000+ daily requests.
- Led sprint planning and daily stand-ups as a Scrum Master in an Agile environment, coordinating tasks for a team of 4 interns.
- Built a scalable content management system with real-time updates for 100+ movie entries, enhancing user engagement by 30%.
- Employed Jira, Spring Boot, MongoDB, React.js, AWS

Expense Tracker

April 2024 - May 2024

- Engineered a MERN-based expense tracker, achieving 95% accuracy by adhering to industry best practices.
- Adopted new technologies through real-time categorization and analytics.
- Created an interactive analytics dashboard, helping users reduce unnecessary spending by an average of 25%.
- Technologies used: MongoDB, Express, React.js, Node.js (MERN).

Sierra – The Songbot

Feb 2024 - March 2024

- Integrated genre classification system, correctly categorizing songs across 10+ distinct genres.
- Implemented mood detection algorithm with 90% accuracy, analyzing 8+ emotional cues from user behavior.
- Utilized Python, TensorFlow, Keras, and Scikit-Learn.

CERTIFICATIONS

1. Machine Learning Specialization - Stanford

- Supervised & Unsupervised Machine Learning
- Advanced Learning Algorithms
- Recommenders, Reinforcement Learning

2. Java Spring Specialization - LinkedIn Learning

- Java Spring Boot 3
- Spring Microservice Architecture
- Spring Security
